

COMPLETE PROJECT PRESENTATION SCRIPT

1. INTRO

Good morning sir/madam,

Our project is Mini Puzzle Game developed using C programming language. It is currently in the initial development stage.

2. PROBLEM STATEMENT

Many beginners find it difficult to understand programming concepts through theory alone. There is a need for simple interactive applications that make learning engaging and fun.

3. SOLUTION

We are developing a console-based mini puzzle game in C that allows users to interact with logical challenges.

4. FEATURES

- Menu-driven interface
- Basic puzzle logic
- User input handling
- Score tracking
- Restart/Exit options

Future:

- More levels
- Timer
- Better UI

5. DEMO

Menu:

1. Start Game
2. Instructions
3. Exit

Example:

2 4 6 8 ? → Answer: 10

6. HOW IT WORKS

Uses loops, conditions, and functions.

7. CHALLENGES

- Designing puzzles
- Handling inputs
- Game flow

8. LEARNING

- Game basics in C
- Logic building
- Debugging

9. CONCLUSION

This is a basic interactive C project to be improved further.

Thank you.
